Our Waste Reduction Roadmap

October 2026

FY21	FY22	FY23	FY24	FY25	FY26	FY27	FY28	FY29	FY30	FY30 target		
8.90t	8.31t	8.55t	7.06t	5.70t	5.49t	—	—	—	<5.7t	Deliver ≤ 5.7t construction waste per completed unit by end of FY30.		
Baseline Year	Graduate Study		Rubble Reduction		Tracking		MMC		Design		Diversion Rate	
	Zero Avoidable Waste gap analysis and plot level waste study at 3no Divisions.		Complete Management Training project, assessing rubble waste.		By end of FY26: roll out “Reduce Our Rubble” campaign.		All Divisions to track in-detail rubble waste at 2no Developments.		Assess benefits from MMC and approve priority opportunities.		Re-assess design-out-waste options.	Achieve ≥95% landfill diversion for all waste, including groundworks and demolition.
	Waste Video		Waste Brokers		Waste Champions		Material Re-use				Passports	Timber Frame
	Develop and launch video toolbox talk with Ecoefficiency.		Promote the use of waste brokers with all Divisions.		Each Division to identify a site-based Waste Champion on every Development.		Assess business case for muck re-use platforms.				Assess the benefits of ‘materials passports’.	Deliver 30% of homes in timber-frame construction by end of FY30.
			Recycling		Supplier Engagement							
			Complete “Simpler Recycling” campaign and rollout in England.		By FY27 complete supplier engagement on packaging and waste reduction. Deliver a webinar with Supply Chain Sustainability School on the Reduce Our Rubble Campaign.							
Years shown are financial years from 1 August to 31 July e.g. FY26 is year ending 31 July 2026.												
Figures shown per year are Bellway construction waste in tonnes, per completed home This figure excludes demolition and groundworker waste.
